Collect more than 40 animal species and subspecies including endangered animals, and exotic species from around the world. Registering... Login: Register Remember me What do you think of this game? You can share your impressions with fellow gamers!Q: Powershell: Get-Mailbox -FolderSize Property Setting I am working on getting a list of a bunch of users within their respective mailboxes. I can query their properties quite easily with the following code: Get-Mailbox -Force -Properties mailboxsize, DisplayName However, mailboxsize is used to determine mailbox size and not the size of the folder within the mailbox. I found the FolderSize property to be what I need, but the -FolderSize option will not work: Get-Mailbox -Force -Properties mailboxsize, DisplayName, FolderSize this error occurs: Get-Mailbox : Unable to find mailbox. At line:1 char:9 + Get-Mailbox -Force -Properties mailboxsize, + ~~~~~ + CategoryInfo : ObjectNotFound: (System.String:String) [Get-Mailbox],
